

Introduction to Working with NVIVO 10

Presenter: Catherine McGowan

FORMAT

Practical workshop. This workshop will include lecture components in addition to computer practicals. This will be a short course format run as a two part session (two three hour sessions).

OVERVIEW

Nvivo is a database package that assists with organising qualitative data. This workshop will provide an introduction to Nvivo 10. It will focus on importing qualitative material and using Nvivo to assist with coding.

IMPORTANT INFORMATION

Workshop requisites: Prior knowledge of the principles of qualitative analysis is **essential** to attend this workshop as only the introductory tools of the software are covered in the workshop.

COURSE OBJECTIVES

- Introduction to the primary tools of NVivo which can assist qualitative researchers in managing and analysing data
- Participants will have the confidence in developing a project from scratch and will have begun to explore the tools NVivo 10 offers to help researchers organise, manage and work with a variety of data.
